

Kentmere Parish Meeting 14 November 2016 - Broadband Developments

By now most residents will know that Kentmere is scheduled to get superfast broadband delivered to two postcode areas – LA8 9JL and LA8 9JP. A map of the area covered is below.

The map is not very clear but this is the best I can get from the deployment maps. I understand that those in the darker pink area should get speeds of around 24mbps. At present I can't say what speeds those in the lighter pink areas will get but they should get some improvement on what they are getting now. The speed will depend on the topology of the network and the distance from the fibre cabinet which will be sited on land adjacent to Pumple Syke.

Connecting Cumbria do not have a time-scale or a detailed map for the deployment so it is still very unclear how long this will take. The only visible progress so far has been a hole dug on the site of the fibre cabinet. And its adjacent pole.

I will keep residents informed when I hear any news.
